New Members Are Always Welcome At the Otago Model Engineering Society

Our main objective is to conduct a social, information sharing and training organization for the purpose of bringing together all persons who are interested in all forms of model engineering.

Joining is easy. Fill in the form and forward it to our postal address. You will then be contacted and the joining process begun.

Once the form is completed and sent in, you are free to attend the club and to meet members with the same interest as yourself. You will also be put on a roster to help with the running in the weekends and at parties a couple of time a year.

If you are unsure of any of the details required on the form, leave the section blank and the Secretary will sort it out.

Model engineering is fun and rewarding. Even if you have made nothing, but are willing to learn, there is an experienced member willing to help.

Enquiries to the secretary. omes.secretary@gmail.com

FOR OFFICE USE ONLY

Committee Approved
